

Meet the Green Wind Renewables team

Green Wind Renewables is a Western Australian company, dedicated to meeting the State's future energy needs through the development of renewable energy projects.

With decades of experience in successfully developing wind farm projects across Australia, our team of renewable energy experts share a common vision to be a leader in the delivery of high-quality renewable energy projects in WA that deliver benefits to our landowners, the community and enable WA businesses to decarbonise.

At the core of Green Wind Renewables' mission is the dedication to providing economic and social benefits to farmers, local communities, and electricity consumers across Western Australia through the development of high-quality wind farm projects that exceed social, environmental, and business expectations.

Green Wind Renewables is the largest dedicated wind farm developer in Western Australia and is continuing to grow as our projects develop.

What are we doing in the Shire of West Arthur?

Green Wind Renewables is currently developing a portfolio of large-scale wind farm projects in WA, totalling up to 2.4GW. We are excited to share that one of the first projects we are progressing is the Ambrosia Wind Farm, located near Moodiarrup in the Shire of West Arthur.

West Arthur is an ideal wind farm location for a number of reasons including:

- Strong and reliable wind source.
- Proximity to the existing electricity grid.
- Cleared farmland and large land holdings which naturally provide a buffer to surrounding properties.

Preliminary wind monitoring has begun at the proposed site of the Ambrosia Wind Farm. We are now progressing to the next phase of evaluating site suitability, constraints, and potential impacts.

What's next?

We are still in the early stages of development and are now commencing our engagement with neighbouring landowners and the wider community.

Over the coming months you may see more of the Green Wind Renewables team in the area. We'd love to meet you so please reach out and say hi!
