

Bird Surveying

In the coming weeks, Green Wind Renewables will be conducting our third bird survey for the Ambrosia Wind Farm. During these surveys a group of environmental scientists walk the area of the proposed wind farm documenting bird species, habitats, population numbers, roosting areas, and food sources. Photos are also taken of different bird species and bushland.

It is important to conduct these surveys numerous times to understand seasonal presence and movements as well as meet regulatory standards.

With this data, the design of the wind farm can be refined to ensure important bird habitats are avoided, and mitigation strategies can be developed to ensure any impacts on local bird species, particularly of listed threatened species or listed migratory species, are minimised where possible.

Come Meet the Team

Following the Shire of West Arthur's Wind Farm Community Consultation Evening on Wednesday 6th of November, Green Wind Renewables will be hosting drop-in sessions for the community to meet the project team and learn more about the Ambrosia Wind Farm.

If you aren't able to come meet us at this session, there are lots more planned after harvest in February 2025. We are also in area regularly and happy to arrange one-on-one meetings.

Location:

West Arthur Community Resource Centre,
Hawthorn Room
27 Burrowes Street, Darkan

When:

Thursday 7th November 2024

Time:

8:30am - 12:30pm

Location:

Moodiarrup Sports Complex,
Arthur River-Boyup Brook Road, Moodiarrup

When:

Thursday 7th November 2024

Time:

1:30pm - 4:30pm
