Ambrosia WIND FARM

Green Wind RENEWABLES

July 2026

Community Information Sessions Coming Soon

The Ambrosia Wind Farm project team is planning to hold a series of community information sessions in the coming months, providing the community with an opportunity to learn more about the project and speak directly with members of the project team.

The sessions will provide an update on the project, outline the next stages of the development process, and give community members the opportunity to ask questions about topics including the proposed wind farm layout, environmental studies, community benefit initiatives and the development application process.

If you have been following the project from the beginning or are interested in learning more, everyone is welcome to attend.

Dates, times and locations will be confirmed shortly and shared through the project website, social media channels and local community noticeboards.

We look forward to meeting with the community and continuing the open conversations that have been an important part of the project to date.
